The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 14, 15, 18, 19 and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Xing *et al.* (US 6,844,109) in view of Kaneta (US 7,029,789), Clarke (US 4,646,430), Kaneta (US 2003/0124416) and Biegger (US 4,879,187), for reasons of record applied to original claims 14, 15, 18 and 19. Claim 21 now depends from claim 14 instead of claim 1.

Claims 20 and 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Xing *et al.* in view of Kaneta '789, Clarke, Kaneta '416 and Bieggar as applied to claim 14 above, and further in view of Yamaura *et al.* (US 6,426,164).

These claims differ from the above combination by reciting cathode and electrolyte materials for lithium ion batteries. Yamaura *et al.* discloses the cathode material Li_xMO_2 , where M is at least Ni or Co, which would thus correspond to the present $\text{Li}_x\text{Ni}_y\text{Co}_z\text{O}_2$ (column 1, lines 64-66), and various electrolyte salt (column 3, lines 63-67) and solvents (column 4, lines 1-14). Because these are intended for lithium ion cells (column 1, lines 12-13), the same type disclosed by Xing *et al.*, it would be obvious to use the cathode and electrolyte materials of Yamaura *et al.* in the battery of Xing *et al.*, also modified according to the teachings of Kaneta '789, Clarke, Kaneta '416 and Bieggar.

Claims 16 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base

claim and any intervening claims. The prior art does not disclose a battery with a section of a conductive electrode tab that includes a material that reacts with the tab during high temperature, to increase the resistance of the tab.

Claims 1-13, for reasons pointed out by applicants, are allowed.

Applicant's arguments filed 17 September 2008 have been fully considered but they are not persuasive.

Applicants argue that Kaneta '416 does not disclose an extruding part of a clamp case that butts against the respective covers of a battery, this feature being recited in claim 1 as now amended. While claim 1 recites this feature, the other independent claim 14 does not.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
